

## advanter® 7.1

### Requirements AppServer

Hardware requirements

Software requirements

#### Informationen

The advanter® Application Server (AAS) is a standard client computer that is centrally responsible for automating recurring tasks. The tasks of the application server are diverse and range from automated invoicing, i.e., the automatic conversion of orders into invoices, to the automatic printing of invoices and data exchange with web shops, web time recording, and other interfaces.

Below you will find the client system requirements for Mac and PC. If you have any questions about systems not listed, e.g., Mac OS X/Windows versions, please contact us in advance so that we can ensure that advanter® runs smoothly.

#### Version

24.09.2025
